Journal of Wind Engineering and Industrial Aerodynamics, 36 (1990) vii–xii
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Contents

Foreword xv

Summary papers

Recent advances in wind engineering: Part I
A. Kareem (Notre Dame, IN, U.S.A.) 1

Recent advances in wind engineering: Part II
J.E. Cermak (Fort Collins, CO, U.S.A.) 17

Recent innovations and future challenges in wind engineering

Physical-modeling investigations for wind engineering: applications beyond wind-load determinations
J.E. Cermak (Fort Collins, CO, U.S.A.) 39

The impact of structural damage in Jamaica due of Hurricane Gilbert and the prospects for disaster reduction
A.G. Davenport (London, Ont., Canada) 53

Bridge aeroelasticity: present state and future challenges
R.H. Scanlan (Baltimore, MD, U.S.A.) 63

Theme lecture I

Downbursts: meteorological features and wind field characteristics
T.T. Fujita (Chicago, IL, U.S.A.) 75

Engineering micrometeorology

A case study of a derecho (windstorm) in the Central Plains
R.P. Kleyla and R.E. Peterson (Lubbock, TX, U.S.A.) 87

A review of the evidence for strong, small-scale vortical flows during downslope windstorms
A.J. Bedard, Jr. (Boulder, CO, U.S.A.) 97

A unified theory of formation of downbursts and tornadoes
C.T. Hsu and E. Uzal (Ames, IA, U.S.A.) 107

The coming deluge of wind data for wind engineers
J.H. Golden (Miami, Fl, U.S.A.) 119

Significant tornadoes.....A 107 year perspective
T.P. Grazulis (St. Johnsbury, VT, U.S.A.) 131

Design loads, codes and specifications

The ICBO high wind/hurricane design committee
J.W. Sheffield (Austin, TX, U.S.A.) 153

The variability of low building wind loads due to surrounding obstructions
T.C.E. Ho, D. Surry and A.G. Davenport (London, Ont., Canada 161

Wind loads on bare and ice-covered overhead conductors
S.G. Krishnasamy and M. Tabatabai (Toronto, Ont., Canada) 171

A deemed-to-comply standard for single and multifamily dwellings in high wind regions
D.C. Perry (Brooklyn, NY, U.S.A.)., J.R. McDonald (Lubbock, TX, U.S.A.) and C.R. O'Meilia (North Palm Beach, Fl, U.S.A.) 181

Tall buildings

Active control of wind-excited structures
C.P. Pantelides (Rolla, MO, U.S.A.) 189

Wind drift serviceability limit state design of multistory buildings
F.A. Charney (Denver, CO, U.S.A.) 203
Structural systems to improve wind induced dynamic performance of high rise buildings
P.V. Banavalkar (Houston, TX, U.S.A.) 213
Wind-induced mean torsional loads on tall buildings
G.R. Lythe and D. Surry (London, Ont., Canada) 225
Optimization of tall structures for wind loadings
C.H. Thornton, L. Joseph and T. Scarangello (New York, NY, U.S.A.) 235

Theme lecture II
The structure of velocity and pressure fields in turbulent flows over bluff bodies, hills and waves
J.C.R. Hunt (Cambridge, U.K.) 245

Hurricanes and tornadoes revisited
The strange life of Hurricane Gilbert, September 11–19, 1988
D.C. Perry (Brooklyn, NY, U.S.A.), J.R. McDonald and R.E. Peterson (Lubbock, TX, U.S.A.) 255
Leasons learned from Hurricane Emily
H.S. Saffir (Coral Gables, FL, U.S.A.) 269
The West Memphis, Arkansas tornado of December 14, 1987
J.R. McDonald (Lubbock, TX, U.S.A.) and P. Selvam (Fayetteville, AR, U.S.A.) 279

Roofs and building envelopes
Effect of leakage and acoustical damping on free vibration of light roofs backed by cavities
M. Novak and M. Kassem (London, Ont., Canada) 289
Wind effect on roofs and roofing systems
C. Kramer and H.J. Gerhardt (Aachen, F.R.G.) 301
Wind loading on loosely laid pavers and insulation boards for flat roofs
H.J. Gerhardt, C. Kramer and K.K. Bofah (Aachen, F.R.G.) 309
Surface pressures and wake flows associated with highly curved agricultural buildings
B. Tahouri, N. Toy and E. Savory (Guildford, U.K.) 319

Measurement of unsteady load effects
Field data analysis of electrical conductor response to winds
K.C. Mehta (Lubbock, TX, U.S.A.) and R. Kadaba (Hartford, CT, U.S.A.) 329
On the measurement of motion induced forces on models in turbulent shear flow
A. Steckley (Guelph, Ont., Canada), B.J. Vickery and N. Isyumov (London, Ont., Canada) . 339
Pressure measuring system for wind-induced pressures on building surfaces
H.H.T. Ng (Gardena, CA, U.S.A.) and K.C. Mehta (Lubbock, TX, U.S.A.) 351
Dynamic interaction for a viscous incompressible flow past a taut cable at moderate Reynolds numbers
P. Seelinger and J. Wauer (Karlsruhe, F.R.G.) 361

Wind characteristics
Effect of upwind obstacles and meteorological tower structure on sensor measurements
S.-H. Shin, R.N. Meroney, R.L. Ewald and D.E. Neff (Port Collins, CO, U.S.A.) 371
The relationship of hurricane reconnaissance flight-level wind measurements to winds measured by NOAA's oceanic platforms
M.D. Powell and P.G. Black (Miami, FL, U.S.A.) 381
Simulation technique for tropical cyclone occurrences
E.D.H. Cheng and A.N.L. Chiu (Honolulu, HI, U.S.A.) 393
Comparison of measured wind velocities from the top of an 800-foot tower in Boston and Logan Airport, Boston
F.H. Durgin, C.J. Pastrone and O.B. Marenzi (Baltimore, MD, U.S.A.) 403

Random data analysis, modelling and system identification

ARMA representation of wind field
Y. Li and A. Kareem (Houston, TX, U.S.A.) 415

MA to ARMA modeling of wind
M.P. Mignolet (Tempe, AZ, U.S.A.) and P.D. Spanos (Houston, TX, U.S.A.) 429

Frequency response function of a transmission tower subjected to multiple loadings
S.H. Liew and H.S. Norville (Lubbock, TX, U.S.,A.) 439

Transfer function models for determining dynamic wind loads on buildings
M.S. Islam (Ithaca, NY, U.S.A.), B. Ellingwood and R.B. Corotis (Baltimore, MD, U.S.A.) ... 449

Waveform analysis techniques for interpreting wind and bridge motion data
H.R. Bosch and H.A. Miklofsky (Tucson, AZ, U.S.A.) 459

Natural and mechanical ventilation and circulation

Scale model and analytical methods to improve natural ventilation of an office
M.F. Lepage and P.A. Irwin (Guelph, Ont., Canada) 469

Thermal confort models for outdoor thermal confort in warm humid climates and probabilities of low wind speeds
R. Aynsley and M. Spruill (Atlanta, GA, U.S.A.) 481

Wind climate and smoke control in covered shopping malls
H.J. Gerhardt and C. Kramer (Aachen, F.R.G.) 489

Wind effects on heat and smoke control of industrial buildings in case of a fire
C. Kramer and H.J. Gerhardt (Aachen, F.R.G.) 499

Some effects of variable porosity and geometry on flow around model barriers
J.F. Hasiuk (El Paso, TX, U.S.A.) and J.D. Iversen (Ames, IA, U.S.A.) 509

Theme lecture III

Computational wind engineering
S. Murakami (Tokyo, Japan) 517

Dynamic effects and structural reliability

A generallized definition of gust factor
G. Solari (Genoa, Italy) 539

Lifetime risk of failure of steel building frames subjected to dynamic wind loading
N.K. Das (Dayton, OH, U.S.A.) and J.R. McDonald (Lubbock, TX, U.S.A.) 549

Wind effects on base isolated buildings
P. Henderson (Hamilton, Ont., Canada) and M. Novak (London, Ont., Canada) 559

Reliability of linear oscillators subject to wind loads
A. Buss (Washington, DC, U.S.A.) and M. Grigoriu (Ithaca, NY, U.S.A.) 571

Bluff body aerodynamics

Effects of incident turbulence on pressure distribution on rectangular prisms
H.W.Tieleman (Blacksburg, VA, U.S.A.) and R.E. Atkins (Lexington, VA, U.S.A.) 579

Measurements of pressure and force fields on building models in simualted atmospheric flows
A. Kareem (Houston, TX, U.S.A.) 589

Section model studies of the Deer Isle–Sedgwick suspension bridge
H.R. Bosch (McLean, VA, U.S.A.) 601

Shielding factors from wind-tunnel studies of prismatic structures
E.C. English (New York, NY, U.S.A.) 611

On uniform flow around rough circular cylinders at critical Reynolds numbers
C. Farell (Minneapolis, MN, U.S.A.) and J. Arroyave (Medellin, Columbia) 621

Dispersion of pollutants and contaminants

Analysis of vapor barrier experiments to evaluate their effectiveness as a means to mitigate HF cloud concentrations
T.C. Steidle, R.N. Meroney, D.E. Neff, S.H. Shin, T.Z. Tan and G. Wu (Fort Collins, CO, U.S.A.) 633

Effect of homogeneous and heterogeneous surface roughness on heavier-than-air gas dispersion
R.L. Petersen (Collins, CO, U.S.A.) 643
Laboratory study of pollutant detention times in wake cavities downwind of low-rise buildings
M.S. Isaacson and G. v. H. Sandri (Boston, MA, U.S.A.) 653
Small-scale modeling of line-integrated concentration fluctuations
M. Poreh (Haifa, Israel) and J.E. Cermak (Fort Collins, CO, US.A.) 665
Wind-tunnel studies of variable stack heights for a low-profile building
B.R. White (Davis, CA, U.S.A.) and W. Stein (Livermore, CA, U.S.A.) 675

Structural resistance to wind hazard
Wind performance limits of roof ballast pavers
J. Pardo (Herndon, VA, U.S.A.) 689
Improving wind resistance of wood-frame houses
H. Liu, V.S. Gopalaratnam (Columbia, MO, U.S.A.) and F. Nateghi (Jefferson City, MO, U.S.A.) 699
Masonry walls subjected to wind-induced lateral loads and uplift
W.L. Shoemaker and A.S. Womack (Auburn, AL, U.S.A.) 709
Impact resistance of common building materials to tornado missiles
J.R. McDonald (Lubbock, TX, U.S.A.) 717

Mitigation of building motion
Reduction of wind induced motion utilizing a tuned sloshing damper
A. Kareem (Houston, TX, U.S.A.) 725
Reduction of tall building motion by aerodynamic treatments
R. Dutton and N. Isyumov (London, Ont., Canada) 739
Method of damped energy calculation for a multilayer viscoelastic (V.E.) damper
P. Mahmoodi (St. Paul, MN, U.S.A.) and C.J. Keel (Seattle, WA, U.S.A.) 749
Wind induced building accelerations
V. Ferraro, P.A. Irwin and G.K. Stone (Guelph, Ont., Canada) 757
Effects of the orientation of the principal axis of stiffness on the dynamic response of a slender square building
N. Isyumov, A. Steckley (London, Ont., Canada), N. Amin and H. Fatehi (San Francisco, CA, U.S.A.) 769

Pedestrian comfort
A scour technique for the evaluation of pedestrian winds
F. Livesey, D. Inculet, N. Isyumov and A.G. Davenport (London, Ont., Canada) 779
Comparison of pedestrian wind acceptability criteria
M.A. Ratcliff and J.A. Peterka (Fort Collins, CO, U.S.A.) 791
Wind tunnel studies for the aerodynamic shape for Sydney, Australia
L.S. Cochran and J.F. Howell (Melbourne, Australia) 801
Criteria for assessing the pedestrian wind environment
C.J. Williams, M.A. Hunter and W.F. Waechter (Guelph, Ont., Canada) 811
Use of the equivalent average for evaluating pedestrian level winds
F.H. Durgin (Baltimore, MD, U.S.A.) 817

Theme lecture IV
Stochastic methods in wind engineering
M. Shinozuka (Princeton, NJ, U.S.A.), C.-B. Yun (Seoul, Korea) and H. Seya (Tokyo, Japan) 829

Snow drift
The effect of a roughness element on local saltation transport
J.D. Iversen, W.-P. Wang (Ames, IA, U.S.A.), K.R. Rasmussen, H.E. Mikkelsen (Aarhus, Denmark), J.F. Hasiuk (El Paso, TX, U.S.A.) and R.N. Leach (Moffett Field, CA, U.S.A.) 845

Mechanics of aeolian transport of snow and sand
R.J. Kind (Ottawa, Ont., Canada) 855
On the relaxation of saltation length as a modeling criteria for particulate transport by wind
J.A. Peterka and R.L. Petersen (Fort Collins, CO, U.S.A.) 867
A continuum mixture theory with an application to turbulent snow, air flows and sedimentation
R. Decker (Huntsville, AL, U.S.A.) 877
Froude number paradoxes in modeling of snowdrift
Y. Anno (Iwate, Japan) 889
Wind tunnel model tests of snow drifting on a two-level flat roof
N. Isyumov and M. Mikitiuk (London, Ont., Canada) 893

Engineering structures
Wind and wave loads on a tension leg platform: theory and experiment
P.J. Vickery (Raleigh, NC, U.S.A.) 905
Stochastic response of tension leg platforms to wind and wave fields
Y. Li and A. Kareem (Houston, TX, U.S.A.) 915
Wind analysis of pipeline suspension bridges
R.A. Dusseau (Detroit, MI, U.S.A.) 927
Stability of cylindrical shells under combined wind and snow loads
R.K. Kapania (Blacksburg, VA, U.S.A.) 937

Damage mitigation
A review of standards of practice for wind resistant manufactured housing
J.R. McDonald (Lubbock, TX, U.S.A.) and J.F. Mehnert (Kansas City, MO, U.S.A.) 949
Mitigation of wind damage to non-engineered and marginally engineered buildings
P.R. Sparks (Clemson, SC, U.S.A.) and H.S. Saffir (Coral Gables, FL, U.S.A.) 957
Mitigation of wind damage to structures during construction
R.T. Ratay (Brooklyn, NY, U.S.A.) 967
Wind damage mitigation strategies for the United States
H. Liu (Columbia, MO, U.S.A.) and E.J. Turner (Collingsville, IL, U.S.A.) 975
Performance of metal buildings in high winds
D.C. Perry (Brooklyn, NY, U.S.A.), J.R. McDonald (Lubbock, TX, U.S.A.) and H.S. Saffir (Coral Gable, FL, U.S.A.) 985

Computational methods
Numerical study of wind pressures on a domed roof and near wake flows
T. Tamura (Tokyo, Japan), K. Kuwahara (Kanagawa, Japan) and M. Suzuki (Tokyo, Japan) 1001
Applying the discrete vortex method to flow about bluff bodies
B. Bienkiewicz (Fort Collins, CO, U.S.A.) and R.F. Kutz (Kansas City, MO, U.S.A.) 1011
Preliminary investigations on the use of spectral methods for flow calculations
L.B. Eldred, R.K. Kapania (Blacksburg, VA, U.S.A.) and H.R. Bosch (McLean, VA, U.S.A.) . 1021
Computer simulation of wind load on a house
R.P. Selvam (Fayetteville, AR, U.S.A.) 1029

Low-rise structures I (Full-scale and model tests)
An overview of Texas Tech's new Wind Engineering Field Research Laboratory
M.L. Levitan, C.V. Chok, D.L. Millsaps and K.C. Mehta (Lubbock, TX, U.S.A.) 1037
The Aylesbury comparative experiment: a status report
B.L. Sill (Clemson, SC, U.S.A.) and N.J. Cook (Watford, U.K.) 1047
Full-scale and model investigations of pressures on an industrial/agricultural building
G.M. Richardson, A.P. Robertson and R.P. Hoxey (Bedford, U.K.) and D. Surry (London, Ont., Canada) 1053

Full-scale measurements of wind pressures on flat roof corners
T. Stathopoulos, A. Baskaran and P.A. Goh (Montreal, Que., Canada) 1063
Wind tunnel simulation of the Texas Tech research building: effects of terrain features and building orientation
B.D. Lakas (Panama City, Panama), K.C. Mehta, E.W. Kiesling and J.R. Dunn (Lubbock, TX, U.S.A.) 1073

Chaotic vibrations and aeroelasticity
Chaotic motions of forced and coupled galloping oscillators
G.R. Cook and E. Simiu (Gaithersburg, MD, U.S.A.) 1083
Longitudinally and transversely spaced cylinders in cross flow
A. Ahmed and C. Ostowari (College Station, TX, U.S.A.) 1095
Modeling spanwise correlation effects in the vortex-induced response of flexible bridges
F. Ehsan, R.H. Scanlan (Baltmore, MD, U.S.A.) and H.R. Bosch (McLean, VA, U.S.A.) 1105
Vibrations of a pair of elastically supported tall building models in a uniform stream
T.C. Su, Q.K. Lian and Y.K. Lin (Boca Raton, FL, U.S.A.) 1115
Wake resonance mechanisms in bluff body interactions
S.R. Ramsay (London, Ont., Canada) 1125

Structural glazing and curtain walls
Development of a new glass thickness selection procedure
W.L. Beason (College Station, TX, U.S.A.) and H.S. Norville (Lubbock, TX, U.S.A.) 1135
Free vibration analysis of insulating glass units
W.P. Vann and Y.C. Das (Lubbock, TX, U.S.A.) 1145
Nonlinear dynamic response of window glass units
C.V.G. Vallabhan, Y.C. Das and S. Kamineni (Lubbock, TX, U.S.A.) 1155
Response of structurally glazed insulating glass units to wind pressures
J.R. Bailey (Lubbock, TX, U.S.A.), J.E. Minor (Rolla, MO, U.S.A.) and R.W. Tock (Lubbock, TX, U.S.A.) 1163
Sirowet — a comprehensive dynamic full-scale curtain wall testing procedure
W.W. Roonan and J.F. Howell (Melbourne, Australia) 1173

Field measurements
Interim findings from full-scale measurements at Hume Point
J.D. Littler and B.R. Ellis (Watford, U.K.) 1181
Internal pressure of low-rise building — field measurements
M. Fahrtash (Lewisburg, PA, U.S.A.) and H. Liu (Columbia, MO, U.S.A.) 1191
Available full-scale on-site wind-induced data from a major tall building
F.H. Durgin, J.R. Macachor and T.J. Gilbert (Baltimore, MD, U.S.A.) 1201
Time and space dependent variations of extreme suction pressures on a tall building
T.J. Gilbert (Baltimore, MD, U.S.A.) and F.H. Durgin 1217

Knowledge-based expert systems
A micro-computer-based expert-system for the design of wood-framed houses to resist wind loads
P.R. Sparks (Clemson, SC, U.S.A.) and Y.B. Singh (Stony Brook, NY, U.S.A.) 1225
An expert system for extreme wind simulation
E.D.H. Cheng and A.N.L. Chiu (Honolulu, HI, U.S.A.) 1235
Development of knowledge-based systems in wind engineering
A. Kareem (Houston, TX, U.S.A.) and R.H. Allen (Newark, DE, U.S.A.) 1245
Structural safety assessment
W. Chen and D. Reed (Seattle, WA, U.S.A.) 1259
Wind loads on building expert system — WINDLOADER
R. Sharpe, B. Marksjo, J. Holmes, P. Fitchett and F. Ho (Highett, Vic., Australia) 1269

Low-rise structures II (wind tunnel modelling)

The effect of Jensen number variations on the wind loads on a low-rise building
J.D. Holmes (Highett, Vic., Australia) and P. Carpenter (Lower Hutt, New Zealand) 1279
Effect of upstream roughness element distribution on wind loads on low rise structures
B.L. Sill and C. Fang (Clemson, SC, U.S.A.) 1289
Wind pressures on buildings with multi-level roofs
T. Stathopoulos and H.D. Luchian (Montreal, Que., Canada) 1299
Wind tunnel simulation of the turbulence in the surface layer
H.W. Tieleman (Blacksburg, VA, U.S.A.) 1309
Recent and current research into wind loading of low buildings at the University of Western Ontario
D. Surry (London, Ont., Canada) 1319

Suspension and cable-stayed bridges

Aerodynamic stability of a truss-stiffened cable-stayed bridge
H.R. Bosch (McLean, VA, U.S.A.) 1331
A minimum design methodology for evaluating bridge flutter and buffeting response
R.H. Scanlan and N.P. Jones (Baltimore, MD, U.S.A.) 1341
Effects of wind turbulence on motion stability of long-span bridges
C.G. Bucher (Innsbruck, Austria) and Y.K. Lin (Boca Raton, FL, U.S.A.) 1355
Wind response prediction of flexible bridges
T. Kumarasena and R.H. Scanlan (Baltimore, MD, U.S.A.) and H.R. Bosch (McLean, VA, U.S.A.) 1365
The influence of topography on the dynamic wind loading of long span bridges
A.G. Davenport and J.P.C. King (London, Ont., Canada) 1373

Wind engineering research applications

High sided road vehicles in cross winds
S.A. Coleman and C.J. Baker (Nottingham, U.K.) 1383
Performance tests of tornado-type wind turbine models
C.T. Hsu and A. Minachi (Ames, IA, U.S.A.) 1393
Upstream and lateral wind turbine wake effects on nearby wind turbine performance
D.E. Neff, R.N. Meroney, E. McCarthy (Fort Collins, CO, U.S.A.) and E. Davis (Livermore, CA, U.S.A.) 1405
Windstorm erosion and soil deposition simulation
J.M. Gregory, J. Borrelli and C.B. Fedler (Lubbock, TX, U.S.A.) 1415
Author Index 1425
